QUESTIONS PRESENTED FOR REVIEW.

1. Whether the Amendments Act and modified controlling laws are in conflict with "whole law of the state"?

2. Whether concurrent jurisdiction applies where occurrences were before August 20, 1988?

3. Whether inconsistent application of time frames in Amendments Act causes retroactive application of 2210 to both ENOs and 2210(N)(2)?

4. Whether sovereign immunity is unavailable to defendants?

5. Whether res judicata is unavailable to defendants?

6. Whether serving of action by U.S. Mail is proper?

JURISDICTIONAL STATEMENT.

This is an Appeal from the denial of a Petition for Review by the Wisconsin Supreme Court. The Appeal is based on the grounds of a controlling law being modified, conflicting State and Federal law and Constitutional issues and is an Appeal under §237 (a) of the Judicial Code, 28 USC §344 (a), 28 USCA §344 (a). The Petition for Review was denied May 4, 1993; and a Remittitur was dated May 6, 1993 by the Court of Appeals of Wisconsin.

STATUTES AND LAWS.

42 USCS §2210 (d)....Neither political question nor separation of powers doctrine precluded judicial relief against government for damages to property caused by radiation emissions from nuclear weapons manufacturing plant. McKay V. U.S., 703 F. 2d 464 (C.A. Colo. 1983).

42 USCS §2210 (s)....Provision of the Price Anderson Act precluding award of punitive damages with respect to a nuclear incident against a person which the United States is obligated to indemnify applies even if the United States is not obligated to make payments for punitive damages, all that is necessary for the applicability of the statute is that the United States be obligated to make payments under an agreement of indemnification covering a nuclear accident. Cook V. Rockwell Intern. Corp., 755 F. Supp. 1468, (D. Colo. 1991).

42 USCS §2210 (n)(1)....This section conferring original jurisdiction on United States District Courts, without regard for diversity of citizenship or amount of controversy, over any public liability action arising out of extraordinary nuclear occurrence did not apply where Secretary of Energy had not designated incident involved as extraordinary nuclear occurrence. UNC Re-

sources, Inc. V. Benally, 518 F. Supp. 1046, (D.C. Ariz. 1981).

42 USC §2210...."Law of the State" within meaning of Price Anderson Act meant whole law of state, including any choice of law provisions, rather than simply net portion which relates specifically to substance. In re HANFORD NUCLEAR RESERVATION LITIGATION, 780 F. Supp. 1551, (E.D. Wash. 1991).

28 USC §1442 (a)(1)....The Court strongly indicated that a grant of federal jurisdiction over all claims involving federal officers would be invalid. Mesa V. California, 489 U.S. 121, 109 S. Ct. 959, 103 L. Ed. 2d 99 (1989).

STATEMENT OF THE CASE.

This case is based on concurrent juriddiction of 42 USCS §2210, the Federal Officer Removal Statute, and modification of controlling law (Silkwood case) in conjunction with intervening decisions creating an altered situation. Defendants are subject to retroactive application of 2210 (s), have "derelict of duty" on ENOs, 2210 (n)(1), have not collaborated with any person 2210 (h), have not offered to settle 2210 (h), with allegations that they have caused all damages, including the Nuclear Waste dumping near Plaintiff's property.

The intervening decisions, IN RE TMI LITIGATION CASES CONSOL. II, 940 F. 2d 832, (3rd Cir. 1991); decision made on July 26, 1991. IN RE HANFORD NUCLEAR RESERVATION LITIGATION, 780 F. Supp. 1551, (E.D. Wash. 1991); decision made Oct. 31, 1991. Plaintiff's Order of Dismissal of first case was June 7, 1991. (appendix, pg.9). The principle of res judicata is inapplicable to the second case because of the changes in the law and intervening decisions creating an altered situation.

Federal questions were raised during a hearing in the first case No. 90-CV-484, on May 30, 1991. The questions raised were sovereign immunity, lack of subject

matter jurisdiction and other reasons set forth on the record. Defendants agreed to remove on basis of "other paper" or other appropriate method. The fraudulent concealment of serious conditions motivated defendants not to act at all. See; Government Nuclear Waste Dump (appendix, pg. 36) located and opened by Plaintiff, only the 1st part of 1993. Another fraudulent concealment was a sabotage act on the Nuclear Missile Base; (1970 Act).

The disposition in the Trial Court, (appendix, pg. 7,) complaint dismissed with prejudice based upon the Doctrine of Res Judicata. The Court of Appeals decision, (appendix, pg. 5) ruled that the Trial Court ruled that Maloney's suit was a replica of the suit he filed in 1990, which the Trial Court had dismissed on the basis of sovereign immunity, lack of subject matter jurisdiction and other grounds. The (defendants) did not give (a notice of dismissal) to Plaintiff as required by Wisconsin Statute. The failure to give notice (Wis. Stat.), caused Plaintiff to lose appeal time by a lengthly period of time. We have reviewed the two complaints and agree with the Trial Court;s conclusion that they are virtually identical. Res Judicata bars such repetitive suits. We also reject Maloney's argument on appeal that

he received no notice of the 1990 lawsuit's dismissal and that res judicata, is therefore not applicable. We know of no such exception to Res Judicata, and Maloney has cited none. Similarly, we reject Maloney's argument that the 1990 lawsuit's contained other defects. Maloney should have raised these matters by appeal from the dismissal.

The Appeals Court filed a remittitur, May 6, 1993 on the Order affirmed. The Wisconsin Supreme Court denied the petition for review on May 4, 1993. The petition for review, was based on the U.S. Supreme Court Case of a previous Wis. case; that being State Farm Mut. Automobile Ins. Co. V. Duel, 65 S. Ct. 573, 324 U.S. 154; (1945). The State Farm case ruled that res judicata is no defense where between the time of the first judgment and the second there has been an intervening decision or a change in the law creating an altered situation.

Immunity issue was raised in Appeals Court reply brief; from not even qualified immunity by violation of clearly established statutory or constitutional right (there is no sovereign immunity available to defendants); People of Three Mile Island V. Nuclear Regulatory

Comm's, 747 F. 2d at 145, (1984), Sec. III, not even qualified immunity.

Plaintiff's second action (appendix, pg.15) clearly specifies (estoppel and waiver by any State or Federal law, Statute or Constitution and total and inclusive of any and all Court decisions and or opinions.

ARGUMENT.

A. A CONTROLLING QUESTION OF LAW (SILKWOOD DECISION) HAS BEEN MODIFIED, COLLABORATION WITH PERSON INDEMNIFIED UNDER 2210 (h) HAS NOT OCCURRED AND OCCURRENCES WERE BEFORE AUGUST 20, 1988, LEAVING CONCURRENT JURISDICTION.

Plaintiff Maloney's case does not fall under the Amendments Act 42 USC §2210 (s), August 20, 1988, because alleged releases and occurrences from Government nuclear waste dumping (appendix, pg. 36) including the example of the U. S. Army Corp. of Engineers dumping in Lake Superior, (appendix, pg. 10), are before (August 20, 1988). The Amendments modify Silkwood's primary holding that punitive damages are never pre-empted by Federal law, but it is unclear to what extent the rest of its reasoning survives. IN RE TMI LITIGATION CASES CONSOL. II, 940 F. 2d at 870, (3rd Cir. 1991. Section 2210 (s) amendments has not changed the requirements of before August 20, 1988 occurrences. In case; Cook V. Rockwell Intern. Corp., 755 F. Supp. at 1479, (D. Colo. 1991): However, I further hold that punitive damages for nuclear incidents occurring before that date are not barred by Section 2210 (s) or by Sovereign Immunity. 42

USC §2210 (s); this section "shall become effective on the date of the enactment of this Act; (August 20, 1988) and shall be applicable with respect to nuclear incidents occurring on or after such date;" Cook Supra, at 1480. Furthermore; even if the United States is not obligated to make payments for punitive damages, all that is necessary for the applicability of the statute is that the United States be obligated to make payments under an agreement of indemnification covering a nuclear accident. Atimic Energy Act of 1954 §170 (s), as amended 42 USCA §2210 (s), Cook Supra, at 1469.

Plaintiff's case here is before the boundaries of August 20, 1988, Amendments Act. The Amendments Act do not apply here because the alleged Government nuclear waste dumping occurred approximately between 1973-1980, with releases during a continued time before August 20, 1988. The Act where on or after (August 20, 1988) has no application whatsoever. Cook Supra, at 1480.

Prior to the Amendments, Congress provided original jurisdiction only for ENOs; (2210 (n)(1). Given the effect of §2210 (n)(1) on liability for such occurrences, this earlier version of §2210 (n)(2) would certainly stand on stronger Constitutional ground. But the appli-

cation of §2210 (n)(1) would be speculative even in those instances. IN RE TMI Supra, at 871. The foregoing involves strict liability. In Hennessy, however the Court left open the issue of whether State law may impose Strict liability for nuclear incidents. Hennessy V. Commonwealth Edison Co., 764 F. Supp. 495, (N.D. Ill. 1991); as used in, IN RE TMI Supra, at 870. The United States as defendants; and alleged extreme "derelict of duty" have made no (ENO) determination under §2210 (n)(1). Plaintiff's complaint details such reckless regard and outrageous acts and meets Conley V. Gibson, 355 US 41, 78 S. Ct. 99, 2 L. Ed. 2d 80 (1957).

The Government is authorized to intervene in public liability actions as soon as it believes it will be required to indemnify a party. In conjunction with 2210 (h) it appears that the United States (the Commission or the Secretary), as appropriate, shall collaborate with any person indemnified 2210 (h) before any attempt to remove. Congress could have authorized in these instances as it has under the Federal Officer Removal Statute, with respect to that statute, the Court has indicated that any other scheme would be unconstitutional. See Mesa V. California, 489 US 121, 109 S. Ct. 959, 103

L. Ed. 2d 99 (1989). (interpreting 28 USC §1442 (a)(1). In addition, because the indemnification issues do not directly affect the merits of the Plaintiffs case the necessity for original jurisdiction is decreased. IN RE TMI Supra, at 874. Where, however, only one person is affected by the nuclear incident, as in O'Conner, 748 F. Supp. 672; or where all claims are filed in a single state court, resolution of the public liability action may efficiently be resolved absent removal. IN RE TMI Supra, at 861.

The equitable doctrine of estoppel in pais, or (the application of) fraudulent concealment a doctrine which can "prevent a ... resort to the statute of limitations as a defense ... where the defendant conceals facts or otherwise induces the plaintiff not to bring suit within the period of the applicable (limitations period). IN RE HANFORD NUCLEAR RESERVATION LITIGATION, 780 F. Supp. at 1576, (E.D. Wash. 1991). Plaintiff Maloney contends that the "estoppel in pais" applies distinctively throughout the case and the Writ of Certiorari. Also see that the Government Nuclear Waste Dump was located and opened by Plaintiff with a geiger counter instrument during the 1st part of 1993. (appendix, pg. 36); The

foregoing dump was the application of fraudulent concealment. Plaintiff Maloney's action may efficiently be resolved absent removal; as used in, IN RE TMI Supra, at 861.

Plaintiff also makes reference to a case where (EN O) was not designated. This section conferring original jurisdiction on United States District Courts, without regard for diversity of citizenship or amount of controversy, over any public liability action arising out of extraordinary nuclear occurrence did not apply where Secretary of Energy had not designated incident involved as extraordinary nuclear occurrence. UNC Resources Inc. V. Benally, 518 F. Supp. 1046, (D.C. Ariz. 1981).

B. DEFENDANTS DO NOT EVEN HAVE QUALIFIED IMMUNITY, BECAUSE THEY HAVE VIOLATED A CLEARLY ESTABLISHED STATUTORY OR CONSTITUTIONAL RIGHT.

The Constitutional violations are clearly delineated in Plaintiff's complaint. The allegations are specific and further delineated throughout the complaint. There is no sovereign immunity available to defendants because they have violated clearly established statutory or constitutional rights. People of Three Mile Island V.

Nuclear Regulatory Comm's, 747 F. 2d at 145, (1984), Sec. III, not even qualified immunity. The evidence filed in this case supports the allegations to an extremely high degree. In fact the evidence shows the defendants have admitted a "dereliction of duty".

C. THE DEFENDANTS HAVE LEFT THEMSELVES AS HOSTILE, UNLAWFUL INDIVIDUALS, ADMITTING "DERELICTION OF DUTY" AND MAKING THE FILING OF A CLAIM HAZARDOUS TO PLAINTIFF, WITH RECKLESS REGARD TOWARD HUMAN LIFE AND LACK OF NUCLEAR WASTE DUMPING INVESTIGATION REMAINS.

See (Motion for Summary Judgment, (appendix, pg. 32,). A summary of the acts and behaviors of defendants. The complaint adequately states the hostility. The Congressional Subcommittee statements by Bella Abzug adequately expresses the behavior towards government inquiries. Bella Abzug; I have learned that not only mine, but several government inquiries were thwarted by intentional refusals on the part of the FBI and Kerr-McGee to cooperate with investigating authorities; (appendix, pg. 29).

Plaintiff Maloney has stated in his brief that approximately 100 violations, non-compliance and civil

penalities based upon violations and non-compliance with Federal regulations, nuclear safety and environmental and health standards. The statements made by Congressional Subcommittee (Bella Abzug), clearly indicates that Karen Silkwood was very active with the OIL, CHEMICAL AND ATOMIC WORKERS UNION, (OCAW) on safety issues and safety of the public from nuclear accidents. Plaintiff Maloney demonstrates very clearly his involvement with the (OCAW) UNION, LOCAL 6-662 & 6-717, Hastings, Minn.) Affidavit, (appendix, pg. 28) that the 100 violations stated above are directly or indirectly involved in the reckless regard towards plaintiff's life. The Government Nuclear Waste Dump was just located and opened up the 1st part of 1993 and it is approximately 200 feet from Plaintiffs house. Other dump areas were located and marked out also.(appendix, pg.36).

The Government dumped the Nuclear Waste and has failed to collaborate with any persons indemnified under 2210 (h). The Price Anderson Act authorizes indemnification agreements, 42 USC §2210 (a), (c), (d). It authorizes the United States to "take charge" and "settle" or defend any such action." 42 USC §2210 (h). Also see, U.S. Army dumping in Lake Superior, (appendix, pg. 10)

of Honeywell waste a defense contractor with many of the violations out of the 100, in the foregoing paragraph.

D. RES JUDICATA IS NO DEFENSE WHERE THERE HAS BEEN AN INTERVENING DECISION OR A CHANGE IN THE LAW CREATING AN ALTERED SITUATION.

The Law governing 2210 has been changed from an intervening decision, Oct. 31, 1991, in case, IN RE HANFORD NUCLEAR RESERVATION LITIGATION, 780 F. Supp. 1551, (E.D. Wash. 1991). "Law of the state" within meaning of Price-Anderson Act, meant whole law of state, including any choice of law provisions, rather than simply net portion which relates specifically to substance.

42 USCS §2210 (L); executive order, as amended, Ex. Ord. No. 12665, Jan. 12, 1989, 54 F.R. 1919, was revoked by Ex. Ord. No. 12774, Sept. 27, 1991, 56 F.R. 59835, 42 USCS §2210 (L) creating situation of unfinished business towards Plaintiff' action and after 1st judgment of June 7, 1991.

The Amendments Act modify Silkwood's primary holding that punitive damages are never pre-empted by Federal law, but it is unclear to what extent the rest of its reasoning survives. IN RE TMI LITIGATION CASES CON-

SOL. II, 940 F. 2d at 870, (3rd Cir. 1991).

Plaintiff Maloney has included in the second action (appendix, pg. 15) (estoppel and waiver by any State or Federal Law, Statute or Constitution and total and inclusive of any and all Court decisions and or opinions) which in fact has applied the U. S. Supreme Court case State Farm Mut. Automobile Ins. Co. V. Duel, 65 S. Ct. 573, at 577, 324 U. S. 154, (1945). But if that principle is inapplicable here it is nevertheless the general rule that res judicata is no defense where between the time of the first judgment and the second there has been an intervening decision or a change in the law creating an altered situation. 2 Freeman on Judgments (5th ed. 1925) §713; Blair V. Commissioner, 300 U.S. 5,9, 57 S. Ct. 330, 332, 81 L. Ed. 465; West Coast Life Ins. Co. V. Merced Irr. Dist., 9 Cir., 114 F. 2d 654, 662; In re Pomeroy, 51 Mont. 119, 151 P. 333; Hurd V. Albert, 214 Cal. 15, 26, 3 P. 2d 545, 76 A.L.R. 1348. We cannot find that Wisconsin has a different rule.

Plaintiff Maloney has not amended action. In the State Farm Supra, at 577; The Wisconsin statute, moreover, gives the court power to allow an amendment "at

any stage of any action or special proceeding before or after judgment, in furtherance of justice and upon such terms as may be just" provided that "the amended pleading states a cause of action arising out of the contract, transaction or occurrence or is connected with the subject of the action upon which the original pleading is based."

E. PLAINTIFF HAD PROPER SERVICE ON DEFENDANTS AND THE DISTRICT OF COLUMBIA AREA IS NOT A STATE, BUT A FEDERAL DISTRICT, AND U.S. MAIL IS PROPER SERVICE BY STATUTE.

Federal Rules of Civil Procedure (Rule (d)(5), pg. 52; Effect of 1983 amendment.) (d)(5) substituted "sending a copy of the summons and of the complaint by registered or certified mail" for "delivering a copy of the summons and of the complaint". Washington, DC is not a State; 801.11, Wis. Stat., Sub. (1) (b) is amended to permit substituted service upon non-residents or residents of other states. Service upon non-residents may be made with the substituted rule of the state wherein service is made. The defendants received the summons and complaint as the receipts show. The following case demonstrates this further; Plaintiff's failure to perfect service by mail under Rule 4 did not preclude ser-

vice under State longarm statute, where defendant received actual notice of suit by method of service authorized by rules and was not unfairly subjected to court's jurisdiction, since literal interpretation of Rule 4 does not automatically require that if attempt to affect service by mail fails, only personal service is permitted. Humana, Inc. V. Avram A. Jacobson, M.D. P.A., 804 F. 2d 1390, (CA 5, Tex 1986).

CONCLUSION.

For the reasons set forth above, plaintiff submits that this court should reinstate this case in the trial court on the basis that the "whole law of the state" is proper; no ENO has been determined, concurrent jurisdiction applies, collaboration with any persons has not occurred under 2210 (h), and "derelict of duty" by defendants is predominant. Res judicata and sovereign immunity* is unavailable to defendants.

DECISION

DATED AND RELEASED

FEBRUARY 16, 1993

A Party may file with the Supreme Court a petition to review an adverse decision by the Court of Appeals pursuant to s. 808.10 within 30 days hereof, pursuant to rule 809.62(1).

NOTICE

This opinion is subject to further editing. If published the official version will appear in the bound volume of the Official Reports.

NO. 92-2110

STATE OF WISCONSIN IN COURT OF APPEALS

DISTRICT III

DANIEL P. MALONEY,

Plaintiff-Appellant,

V.

UNITED STATES OF AMERICA, ET AL.,

Defendant-Respondent.

APPEAL from an order of the circuit court for St. Croix county:

ERIC J. LUNDELL, Judge. Affirmed.

Before Cane, P.J., LaRocque and Myse, JJ.

PER CURIAM. Daniel Maloney appeals an order that dismissed his action against the United States of America on the basis of res judicata. The trial court ruled that Maloney's suit was a replica of the suit he filed in 1990, which the trial court had dismissed on the basis of sovereign immunity, lack of subject matter jurisdiction and other grounds. We have reviewed the two complaints and agree with the trial court's conclusion that they are virtually identical. Res judicata bars such repetitive suits. Juneau Square Corp. V. First Wis. Nat. Bank, 122 Wis. 2d 673, 682, 364 N.W. 2d 164, 169 (Ct. App. 1985). We also reject Maloney's argument on appeal that he received no notice of the 1990 lawsuit's dismissal and that res judicata is therefore not applicable. we know of no such exception to res judicata, and Maloney has cited none. Similarly, we reject Maloney's argument that the 1990 lawsuit's contained other defects. Maloney should have raised these matters by appeal from the first dismissal.

By the Court.--Order affirmed.

This opinion will not be published. See Rule 809.23 (1)(b)5, Stats.

STATE OF WISCONSIN CIRCUIT COURT ST. CROIX CO.

DANIEL P. MALONEY,

PLAINTIFF,

V. Case No. 92-CV-70

UNITED STATES OF AMERICA,

DEFEMDANT.

ORDER OF DISMISSAL

Plaintiff filed a complaint in the above-captioned cause of action on February 10, 1992. Said complaint is a replica of the complaint he filed on October 29, 1990, in the case of Daniel P. Maloney V. United States of America, et al., St. Croix County Case No. 90-CV-484. That case was dismissed by the court by order entered on June 7, 1991, based upon sovereign immunity, lack of subject matter jurisdiction, and other reasons set forth on the record during a hearing on May 30, 1991. The complaint in the present case is nearly identical to the plaintiff's complaint in the earlier lawsuit. Since the issues in the present lawsuit were already decided in the earlier lawsuit, the present lawsuit is barred by the Doctrine of Res Judicata. Accord-

ingly,

IT IS HEREBY ORDERED that the plaintiff's complaint is DISMISSED with prejudice, based upon the Doctrine of Res Judicata.

Entered this 21st day of May, 1992.

Eric J. Lundell

DEFENDANTS.

ORDER OF DISMISSAL

The defendants' Motion to Dismiss having come on to be heard on the 30th day of May, 1991, the plaintiff Daniel P. Maloney appearing in person, and the defendants appearing by Grant C. Johnson, United States Attorney for the Western District of Wisconsin, by Richard D. Humphrey, Chief, Civil Division, United States Attorney's Office, and the court having set forth its reasons on the record for dismissal of this cause of action, including but not limited to sovereign immunity and lack of subject matter jurisdiction,

IT IS HEREBY ORDERED that this action is dismissed. Entered this 7th day of June, 1991.

ATTN: Mr. Robert Dempsey :::::IN NIKE BASE PRESENTLY:

Engineer Manager

1421 U.S.P.O., Custom House

St. Paul, Mn. 55101-1479

Dear Mr. Dempsey:

This refers to your January 2, 1991 telephone conversation with Mr. James Lynch of my staff, regarding the Corp's efforts to recover Honeywell, Inc. waste drums from Lake Superior. Since it is alleged that the drums may contain radioactive material and since Honeywell was and is an NRC licensee, we are interested in the results of the search and recovery operations.

Please keep this office informed of any developments relating to the recovery efforts. We would also appreciate a copy of your report, which we understand should be available in Febr'ary, and a copy of the Army's 1977 report on this same subject. If health physics support is needed during the process, we will make every effort to assist you. Your cooperation in this matter is greatly appreciated. Followup information or questions regarding this issue should be addressed to Mr. Lynch or Mr. J.

Caniano at (708) 790-5500.

Sincerely,

John A. Grobe, Chief
Nuclear Materials Safety

MEDIA ADVISORY

CORPS AWARDS CONTRACT FOR LAKE SUPERIOR BARREL SEARCH

WHO: St. Paul District, U.S. Army Corps of Engineers, St. Paul, Minnesota

WHAT: Has awarded a contract to Hazard Control, Inc. of Minneapolis, Minn. in the amount of $16,550.00 to conduct a search of the Lake Superior bottom near Duluth, Minn. for barrels dumped into Lake Superior by the U.S. Army between 1959 and 1962. The 1,437 barrels contain metal scraps produced during the research and manufacture of classified munitions.

The search operation has three phases. First, the contractor will conduct an electronic search of the 20-square mile target area using sonar and electro-magnetic detection systems. The second phase of the search involves a search of possible barrel locations based on historical records and data from the electronic search. The second phase will use a two-person submarine provided by the contractor to attempt to locate and photograph as many barrels as possible. The contract allows for approximately five days of search operations. If time permits within the contract, a third phase might include closer inspection of located barrels and an at-

temot to recover one or two barrels. Any barrel recovered will he sealed in an over-sized container and sent to an independent laboratory for analysis of the contents.

WHERE: The search operation will be conducted in an approximately 20-square mile area off the North Shore of Lake Superior between the Lester River and the Knife River. Records indicate that the barrels were dumped in water greater than 100-300 feet in depth.

WHEN: The contract was awarded on September 28, 1990. The search is tentatively scheduled to begin on Thursday October 11, 1990, weather permitting.

WHY: The barrel search project is being condcuted under the Defense Environmental Restoration Program, a Department of Defense subsection of the EPA Superfund Program. One aspect of the restoration program includes finding and inspecting sites formerly owned or used by DOD. Once located, the sites are inspected for hazardous debris, munitions or toxic materials related to the operation of the site by DOD. Since the barrels contained material generated by a DOD contractor working on a classified defense munitions contract and the disposal was directed by an Army organization, the barrel disposal site

qualifies for review and analysis under the Defense Environmental Restoration Program for Formely Used Defense Sites. The current contract will provide data to be used by the Corps in determining the need for any future remedial action.

MEDIA ARRANGEMENTS: Media arrangements (news conferences, equipment demonstration,, Duluth media center telephone number, etc.) will be announced on October 9th.

CONTACT: Ken Gardner or Joan Guilforly at 612-220-0201. US Army Corps of Engineers, 1421 US Post Office, St. Paul MN 55101-9808. The project's media center will open at the Corps' Duluth Area Office on Thursday, October 11th.

STATE OF WISCONSIN CIRCUIT COURT ST. CROIX COUNTY

DANIEL P. MALONEY,

PLAINTIFF,

VS. COMPLAINT

UNITED STATES OF AMERICA, et al., NO. 92-CV-70

DEFENDANTS.

The Plaintiff, Daniel P. Maloney brings this complaint against the above defendants and shows the Court as follows:

FIRST CAUSE OF ACTION

1. United States of America and the Atomic Energy Commission, (DOE), with a Mailing address of Washington, DC.

2. United States of America and the Nuclear Regulatory Commission, with a mailing address of Washington, D.C..

3. United States of America and the Central Intelligence Agency (CIA), with a mailing address of Washington, D.C..

4. United States of America and the Pentagon, with a mailing address of Washington, D.C..

5. The above defendants, by waiver and estoppel are void of any legitimate defense or issue within this com-

plaint. Plaintiff's right to any claim, antecedent claim, total and inclusive, whether invoked by estoppel or waiver, remains in full for prosecution by plaintiff, (estoppel and waiver by any State or Federal Law, Statute or Constitution and total and inclusive of any and all Court decisions and or opinions).

6. Atomic Energy claims under 42 USCS §2210 (n), maintain a waiver of issues or defenses, jurisdiction and venue. The waiver of any such issue or defense may otherwise be deemed jurisdictional or relating to an element in the cause of action. Accordingly, such waivers shall be judicially enforcible in accordance with their terms by the claimant against the person indemnified. All, meaning total and inclusive, issues or defenses are negated by waiver and estoppel, whether by negligence, wanton disregard, or any other form on neglect.

7. Nike Battery 20, was a SAC US Defense, Missile Base, located near Roberts, Wisc.; (retaining Federal Funding 10-27-90).

8. Unstated Nuclear facility, unstated address, to state further would be a violation of Federal Law; (2nd facility).

9. Plaintiff contends that the Top Secret Nuclear

Espionage issued from USDA through photos to plaintiff was a violation of the Espionage Act and Plaintiff was obligated to recapture and report the Espionage under 18 USCS §1505 and §1503.

10. Plaintiff contends that the unstated Nuclear facility was in such a condition as to allow plaintiff to enter the facility by FCC communications, that being the control room, where it was stated it is impossible to enter the control room from the inside of the facility or from the outside by FCC communications; causation Federal negligence, reckless regard.

11. As a proximate result of these contacts with "radiation hazards" and the negligence plaintiff Daniel P. Maloney, suffered personal injuries, distress, anxiety, property damage and life, liberty and property, Art. 14, Sec. 1, U.S. Constitution; equal protection of the laws violations distress injuries.

12. The above described injuries were solely and proximately caused by unreasonably dangerous "radiation hazards" under theories of strict liability.

13. Plaintiff alleges violations of Nuclear Regulatory Commission being 42 USCS §2021 (b)(4), facilities that were somehow in violation of the Atomic Energy Com-

Mission Rules and are licensed to possess special nuclear material in quantity to form a critical mass; Government negligence causation.

14. Plaintiff alleges violations of Espionage Act (18 USCA §794; (b,c), 18 USCA §793, §794; and the Espionage Act of 1917.

15. Plaintiff contends that the negligence constitutes the exercise of a unreasonable care in handling and maintaining Plutonium, and the existence of reckless and wanton conduct in light of the physical characteristics of that material and the risks associated with it; Government negligence.

16. Plaintiff contends that the Atomic Energy Act and the Price-Anderson Act that the Government can provide up to $500,000,000.00 of liability for a cause of action involving "nuclear hazards" and the compensatory damages are an implicit part of the Federal regulatory scheme and furthermore the damages will deter the defendant and others like it, from committing similar acts in the future.

17. Plaintiff exercises the State law rights that being, that making a payment of $500,000,000.00 through the State Court is permissible and available for the

damages and injuries suffered by plaintiff.

18. Plaintiff advises that punitive damages need not be proved by "direct evidence of fraud, malice or gross negligence, but could be inferred and that the primary concern was to assure compensation for persons who suffered loss or injury.

19. Plaintiff contends that any amount less than $500,000,000.00 would be inadequate for the injury suffered in this case where plaintiff has been deprived of the services, society, companionship and consortium; and furthermore the distress, anxiety, psychological stress from an automobile rigged up in an unreasonably dangerous condition to kill plaintiff and such as the telephone call stating that they were going to kill plaintiff, known as (Pentagon People).

20. Plaintiff contends that the Government provides $500,000,000.00 for any one nuclear situation "nuclear hazards" related and the proceeds will apply where the injuries were proximately caused by the negligence of the United States of America.

21. Plaintiff contends that Congress encourages National Safety Regulation under the Price-Anderson Act and Plaintiff may vindicate any particular harm

visited on him from whatever source related to "nuclear hazards".

22. Plaintiff demands that $500,000,000.00 for the nuclear incidents is a fair and just amount for psychological distress, emotional distress, property damage and anxiety, under the Atomic Energy Act and the Price-Anderson Act.

23. Plaintiff bases the amount on extraordinary occurrences of "nuclear hazards" and the negligence is wanton disregard of Plaintiff's rights and that malice and evil intent were inferred; 28 USCS §1257.

24. Plaintiff contends that he has a right to $500,000,000.00 as set by Congress for punishment to the offenders, for the general benifit of society and as a restraint upon the transgressors and a warning and example to deter like offenses in the future. The compensation is calculated by reference to the victims injury.

SECOND CAUSE OF ACTION

25. Plaintiff realleges Paragraphs 1 through 24 of the First cause of action against the defendants with like force and effect as if realleged in full.

26. Plaintiff alleges that he suffered further psychological and physical damage from contaminants left

and carelessly disposed of and said contaminants caused a physical sickness and severe anxiety to plaintiff.

27. Plaintiff further alleges some contaminants related to and used in a nuclear facility were dumped on his property and surrounding property and the specific contaminants caused a physical sickness to plaintiff and anxiety reactions from such.

28. The above described injuries were proximately caused by negligence and such negligence is wanton disregard of plaintiff's rights and that malice and evil intent were inferred from such; 28 USCS §1257.

29. Plaintiff contends that Congress encourages National Safety Regulation under the Price-Anderson Act and plaintiff may vindicate any particular anxiety or harm on him from whatever source related to "nuclear hazards". Furthermore plaintiff has a right to $500,000,000.00 damages set by Congress for punishment to offenders and any particular harm from such.

30. Plaintiff prays that the Court allow the full extent of what Congress encourages and that is the full amount of $500,000,000.00 for the damages to plaintiff.

PLAINTIFF DEMANDS A 12 PERSON JURY TRIAL

DANIEL P. MALONEY,

PLAINTIFF,

VS.

UNITED STATES OF AMERICA,

DEFENDANTS,

COMPLAINT

No. 90-CV-484

file date: Oct. 29, 90

The plaintiff by Daniel P. Maloney, Pro Se, complain of the defendants as follows;

FIRST CAUSE OF ACTION

1. United States of America and the Atomic Energy Commission, with a mailing address of Washington, D.C.

2. United States of America and the Nuclear Regulatory Commission, with a mailing address of Washington, D.C..

3. United States of America and the Central Intelligence Agency (CIA), with a mailing address of Washington, D.C..

4. United States of America and the Pentagon, with a mailing address of Washington, D.C.

5. Nike Battery 20, was a SAC US Defense, Missile Base located near Roberts, Wisc.; (retaining Federal Funding 10-27-90).

6. Unstated Nuclear facility, unstated address, to state further would be a violation of Federal Law; (2nd facility).

7. Plaintiff contends that the Top Secret Nuclear Espionage issued from USDA through photos to plaintiff was a violation of the Espionage Act and plaintiff was obligated to recapture and report the Espionage under 18 USCS §1505, and §1503.

8. Plaintiff contends that the unstated Nuclear facility was in such a condition as to allow plaintiff to enter the facility by FCC communications, that being the control room, where it was stated it is impossible to enter the control room from the inside of the facility or from the outside by FCC communications; causation Federal negligence, reckless regard.

9. As a proximate result of these contacts with "radiation hazards" and the negligence plaintiff Daniel D. Maloney, suffered personal injuries, distress, anxiety, property damage and life, liberty and property Art. 14, Sec. 1, US Constitution; equal protection of the laws violations distress injuries.

10. The above described injuries were solely and proximately caused by unreasonably dangerous "radiation

hazards" under theories of strict liability.

11. Plaintiff alleges violations of Nuclear Regulatory Commission being 42 USCS §2021 (b) (4), facilities that were somehow in violation of the Atomic Energy Commission Rules and are licensed to possess special nuclear material inquantity to form a critical mass; Government negligence causation.

12. Plaintiff alleges violations of Espionage Act (18 USCA §794; (b,C), 18 USCA §793, 794; and the Espionage Act of 1917.

13. Plaintiff contends that the negligence constitutes the exercise of a unreasonable care in handling and maintaining Plutonium, and the existence of reckless and wanton conduct in light of the physical characteristics of that material and the risks associated with it, Government negligence.

14. Plaintiff contends that the Atomic Energy Act and the Price-Anderson Act that the Government can provide up to $500,000,000.00 of liability for a cause of action involving "nuclear hazards" and the compensatory damages are an implicit part of the federal regulatory scheme and furthermore the damages will deter the defendant and others like it, from committing similar acts in the future.

15. Plaintiff exercises the State law rights that being that making a payment of $500,000,000.00 through the State Court is permissible and available for the damages and injuries suffered by plaintiff.

16. Plaintiff advises that punitive damages need not be proved by "direct evidence of fraud, malice or gross negligence, but could be inferred and that the primary concern was to assure compensation for persons who suffered loss or injury.

17. Plaintiff contends that any amount less that $500,000,000.00 would be inadequate for the injury suffered in this case where plaintiff has been deprived of the services, society, companionship and consortium; and furthermore the distress, anxiety, psychological stress from an automobile rigged up in an unreasonably dangerous condition to kill plaintiff and such as the telephone call stating that they were going to kill plaintiff, known as (Pentagon People).

18. Plaintiff contends that the Government provides $500,000,000.00 for any one nuclear situation "nuclear hazards" related and the proceeds will apply where the injuries were proximately caused by the negligence of the United States of America.

19. Plaintiff contends that Congress encourages National Safety Regulation under the Price-Anderson Act and plaintiff may vindicate any perticular harm visited on him from whatever source related to "nuclear hazards".

20. Plaintiff demands that $500,000,000.00 for the nuclear incidents is a fair and just amount for psychological distress, emotional distress, property damage and anxiety, under the Atomic Energy Act and the Price-Anderson Act.

21. Plaintiff bases the amount on extraordinary occurrances of "nuclear hazards" and the negligence is wanton disregard of Plaintiffs rights and that malice and evil intent were inferred; 28 USCS §1257.

22. Plaintiff contends that he has a right to $500,000,000.00 as set by Congress for punishment to the offenders, for the general benfit of society and as a restraint upon the transgressors and a warning and example to deter like offenses in the future. The compensation is calculated by reference to the victims injury.

SECOND CAUSE OF ACTION

23. Plaintiff realleges Paragraphs 1 through 21 of the First cause of action against the defendants with like force and effect as if realleged in full.

24. Plaintiff alleges that he suffered further psychological and physical damage from contaminants left and carelessly disposed of and said contaminants caused a physical sickness and severe anxiety to plaintiff.

25. Plaintiff further alleges some contaminants related to and used in a nuclear facility were dumped on his property and surrounding property and the specific contaminants caused a physical sickness to plaintiff and anxiety reactions from such.

26. The above discribed injuries were proximately caused by negligence and such negligence is wanton disregard of plaintiffs rights and that malice and evil intent were inferred from such; 28 USCS §1257.

27. Plaintiff contends that Congress encouraces National Safety Regulation under the Price-Anderson Act and plaintiff may vindicate any particular anxiety or harm on him from whatever source related to "nuclear hazards". Furthermore plaintiff has a right to $500,000,000.00 damages set by Congress for punishment to offenders and any particular harm from such.

AN URGENT NOT FROM: BELLA S. ABZUG

Dear Friend,

Three years ago my Congressional Subcommittee on Individual Rights did an initial probe into the facts surrounding the death of a 28-year-old worker in a Kerr-McGee plutonium production plant, Karen Silkwood.

It was my hope that a Congressional investigation would uncover how Karen Silkwood and her home were contaminated with deadly plutonium--- and what happened the night of her mysterious death.

I have learned that not only mine, but several government inquiries were thwarted by intentional refusals on the part of the FBI and Kerr-McGee to cooperate with investigating authorities. And, the most recent inquiries are being obstructed with the all-too-familiar claim of "national security". I am increasingly concerned and want to share with you some of the available information about Karen's death and what she was trying to bring to our attention.

By detailing some of Karen's last moments alive, I hope to convey to you how crucial this case is. Much of what we know today is the result of the back-breaking and crusading efforts of the National Emergency Civil

Liberties Foundation, the Quixote Center, Supporters of Silkwood (S.O.S.), and the N.O.W. Labor Committee---organizations which have coordinated investigations, litigation, education, and fundraising on Karen's behalf since 1975. These organizations and others are now cooperatively supporting this case through the Karen Silkwood Fund---a tax-exempt program of the Youth Project.

During the last months of her life Karen Silkwood was very active within her union, the Oil, Chemical and Atomic Workers. She was not only involved with safety issues on her job---she was also concerned with the larger question: the safety of the public from nuclear accidents. For a month before her death Karen was collecting documented evidence about alarming plant hazards for upcoming contract negotiations and for national press.

Karen;s specific job was that of a laboratory technician checking various fuel mixtures. Fearful of its toxicity, Karen was careful when handling plutonium on the job. But, a week before her death, an instrument search revealed that karen was heavily contaminated. This was not from an accidental spill on her job which could have conceivably occurred rather, Karen was con-

taminated from where she least expected it....her home!! And the Government Accounting Office (GAO) Report revealed that the highest levels of contamination were on the food in her refrigerator!!!

STATE OF WISCONSIN CIRCUIT COURT ST. CROIX COUNTY

DANIEL P. MALONEY,

PLAINTIFF

V.

UNITED STATES OF AMERICA, et al.,

DEFENDANTS.

CASE NO. 92-CV-70

MOTION FOR SUMMARY JUDGMENT

DANIEL P. MALONEY, PLAINTIFF IN THE ABOVE ACTION, HEREBY MOVES THE COURT FOR SUMMARY JUDGMENT IN HIS FAVOR AGAINST THE UNITED STATES OF AMERICA, et. al., DEFENDANTS HEREIN.

THIS MOTION IS BASED ON ATTACHED AFFIDAVITS, FILINGS AND COMPLAINT, WHEREBY THE DEFENDANTS, KNOWN AS THE UNITED STATES OF AMERICA, et. al., HAVE DEMONSTRATED A HOSTILE AND PREJUDICIAL SERIES OF BEHAVIORS, TO AVOID TREATMENT OF ANY CLAIM FROM PLAINTIFF. THE NATURE OF THE HOSTILE AND PREJUDICIAL BEHAVIORS, HAVE INCLUDED OBSTRUCTING CONGRESSIONAL INVESTIGATIONS, RIGGING UP PLAINTIFF"S AUTOMOBILE TO KILL HIM, THEFT OF EVIDENCE ON DEVICES TO EXPLODE PLAINTIFF"S AUTOMOBILE, A TELEPHONE CALL (2) THREATING TO KILL PLAINTIFF AND MANY OTHER NUMEROUS THREATS ON HIS LIFE. DEFENDANTS HAVE MAINTAINED INDIFFERENCE AND A HOSTILE ATTITUDE TOWARDS

STATEMENTS MADE IN 1981 AND 1982, CONGRESSIONAL HEARINGS ON PHYSICAL SECURITY ON U. S. MILITARY BASES AND ESPIONAGE/PHYSICAL SECURITY RELATED FACTORS. THE FOREGOING HAS LEFT THE INDEMNITY AGREEMENT FOR DAMAGES IN A ADVERSE PROCEDURAL POSTURE ON STATUTE 42 USCS §2210.

THE ABOVE HOSTILE AND PREJUDICIAL ACTIONS IN CONJUNCTION WITH A FAILURE TO TAKE REASONABLE STEPS TO MITIGATE DAMAGES ON PLAINTIFF WHO IS INDEMINIFIED UNDER 42 USCS §2210, MAKE THIS MOTION FOR SUMMARY JUDGMENT PROPER. WAIVER OF ANY ISSUES AND DEFENSES ARE ALSO PROPER.

THIS MOTION, FURTHERMORE IS MADE ON THE GROUNDS THAT THE DEFENDANTS, AS A MATTER OF LAW (42 USCS § 2210) ARE OBLIGATED TO INDEMNIFY THE PLAINTIFF FOR ALL SUMS WHICH THE PLAINTIFF MAY DEMAND AND RECOVER AGAINST DEFENDANTS. PLAINTIFF PRAYS THAT THE COURT GRANT THE COMPLETE AMOUNT OF DAMAGES FROM THE DEFENDANTS BASED ON THE FOREGOING.

RESPECTFULLY SUBMITTED;

DATED: 5-4-92 Daniel P. Maloney

GOVERNMENT NUCLEAR WASTE DUMP

§2210 (a) Requirement of financial protection for licenses

Each license issued under section 2133 or 2134 of this title and each construction permit issued under section 2235 of this title shall, and each license issued under section 2073, 2093, or 2111 of this title may, for the public purposes cited in section 2012 (i) of this title, have as a condition of the license a requirement that the licensee have and maintain financial protection of such type and in such amounts as the Nuclear Regulatory Commission (in this section referred to as the "Commission") in the exercise of its licensing and regulatory authority and responsibility shall require in accordance with subsection (b) of this section to cover public liability claims. Whenever such financial protection is required, it may be a further condition of the license that the license execute and maintain an indemnification agreement in accordance with subsection (c) of this section. The Commission may require, as a further condition of issuing a license, that an applicant waive any immunity from public liability conferred by Federal or State law.

§2210 (c) Indemnification of licenses[1] by Nuclear Regulatory Commission.

The Commission shall, with respect to licenses issued between August 30, 1954, and August 1, 2002, for which it requires financial protection of less than $560,000,000.00, agree to indemnify and hold harmless the licensee and other persons indemnified, as their interest may appear, from public liability arising from nuclear incidents which is in excess of the level of financial pretection required of the licensee. The aggregate indemnity for all persons indemnified in connection with each nuclear incident shall not exceed $500,000,000.00 excluding costs of investigating and settling claims and defending suits for damage: Provided, however, That this amount of indemnity shall be reduced by the amount that the financial protection required shall exceed $60,000,000.00. Such a contract of indemnification shall cover public liability arising out of or in connection with the licensed activity. With respect to any production or utilization facility for which a construction permit is issued between August 30, 1954, and August 1, 2002, the requirements of this subsection shall apply to any license issued for such facility subsequent to August

1 , 2002.

(d) Indemnification of contractors by Department of Energy.

(1)(A) In addition to any other authority the Secretary of Energy (in this section referred to as the "Secretary") may have, the Secretary shall, until August 1, 2002, enter into agreements of indemnification under this subsection with any person who may conduct activities under a contract with the Department of Energy that involves the risk of public of public liability and that are not subject to financial protection requirements under subsection (b) of this section or agreements of indemnification under subsection (c) or (k) of this section.

(B)(i)(I) Beginning 60 days after August, 1988, agreements of indemnification under subparagraph (A) shall be the exclusive means of indemnification for public liability arising from activities described in such subparagraph, including activities conducted under a contract that contains an indemnification clause under Public Law 85-804 entered into between August 1, 1987, and August 20, 1988.

(II) The Secretary may incorporate in agreements of in-

demnification under paragraph (A) the provisions relating to the waiver of any issue or defense as to charitable or governmental immunity authorized in subsection (n)(1) of this section to be incorporated in agreements of indemnification. Any such provisions incorporated under this subclause shall apply to any nuclear incident arising out of nuclear waste activities subject to an agreement of indemnification under subparagraph (A).

(ii) Public liability arising out of nuclear waste activities subject to an agreement of indemnification under subparagraph (A) that are funded by the Nuclear Waste Fund established in section 10222 of this title shall be compensated from the Nuclear Waste Fund in an amount not to exceed the maximum amount of financial protection required of licensees under subsection (b) of this section.

(2) In agreements of indemnification entered into under Paragraph (1), the Secretary may require the contractor to provide and maintain financial protection of such type and in such amounts as the Secretary ahall determine to be appropriate to cover public liability arising out of or in connection with the contractual activity, and shall indemnify the persons indemnified against such claims above the amount of the financial protection required, to the full extent of the aggregate public

liability of the persons indemnified for each nuclear incident, including such legal costs of the contractor as are approved by the Secretary.

(3)(A) Notwithstanding paragraph (2), if the maximum amount of financial protection required of licensees under subsection (b) of this section is increased by the Commission, the amount of indemnity, together with any financial protection required of the contractor, shall at all times remain equal to or greater than the maximum amount of financial protection required of licensees under subsection (b) of this section.

(B) The amount of indemnity provided contractors under this subsection shall not, at any time, be reduced in the event that the maximum amount of financial protection required of licensees.

(C) All agreements of indemnification under which the Department of Energy (or its predecessor agencies) may be required to indemnify any peron, shall be deemed to be amended, on August 20, 1988, to reflect the amount of indemnity for public liability and any applicable financial protection required of the contractor under this subsection on such date.

(4) Financial protection under paragraph (2) and indemnification under paragraph (1) shall be the exclusive means of financial protection and indemnification under this section for any Department of Energy demonstration reactor licensed by the Commission under section 5842 of this title.

(5) In the case of nuclear incidents occurring outside the United States, the amount of the indemnity provided by the Secretary under this subsection shall not exceed $100,000,000.00 .

(6) The provisions of this subsection may be applicable to lump sum as well as cost type contracts and to contracts and projects financed in whole or in part by the Secretary.

(7) A contractor with whom an agreement of indemnification has been executed under paragraph (1)(A) and who is engaged in activities connected with the underground detonation of a nuclear explosive device whall be liable to the extent so indemnified under this subsection, for injuries or damage sustained as a result of such detonation in the same manner and to the same extent as would a private person acting as principle, and no immunity or defense founded in the Federal or State, or municipal

character of the contractor or of the work to be performed under the contract shall be effective to bar such liability.

(h) Conditions of agreement of Indemnification.

The agreement of indemnification may contain such terms as the Commission or the Secretary, as appropriate, deems appropriate to carry out the purposes of this section. Such agreement shall provide that, when the Commission or the Secretary, as appropriate, makes a determination that the United States will probably be required to make indemnity payments under this section, the Commission or the Secretary, as appropriate, shall collaborate with any person indemnified and may approve the payment of any claim under the agreement of indemnification, appear to settle claims as Counsel on behalf of the person indemnified, take charge of approve the settlement of any such claim on a fair and reasonable basis with due regard for the purposes of this chapter. Such settlement shall not include expenses in connection with the claim incurred by the person indemnified.

(n) Waiver of defenses and judicial procedures.

(n) Waiver of defenses and judicial procedures.

(1) With respect to any extraordinary nuclear occurrence to which an insurance policy or contract furnished as proof of financial protection or an indemnity agreement applies and which-

(A) arises out of or results from or occurrs in the course of the construction, possession, or operation of a production or utilization facility.

(B) arises out of or results from or occurs in the course of transporation of source material, byproduct material, or special, or special nuclear material to or from a production or utilization facility.

(C) during the course of the contract activity arises out of or results from the possession, operation, or use by a Department of Energy contractor or subcontractor of a divice utilizing special material or byproduct material.

(D) arises out of, results from, or occurs in the course of, the construction, possession, or operation of any facility licensed under section 2073, 2093, or 2111, of this title, for which the Commission has imposed as a condition of the license a requirement that the license have and maintain financial protection under

subsection (a) of this section.

(E) arises out of, results from, or occurs in the course of, transporation of source material, byproduct material, or special nuclear material to or from any facility licensed under section 2073, 2093, or 2111 of this title, for which the Commission has imposed as a condition of the license a requirement that the licensee have and maintain financial protection under subsection (a) of this section, or

(F) arises out of, results from, or occurs in the course of juclear waste activities.

the Commission or the Secretary, as appropriate, may incorporate provisions in indemnity agreements with licensees and contractors under this section and may require provisions to be incorporated in insurance policies or contracts furnished as proof of financial protection, which waive (i) any issue or defense as to conduct of the claimant or fault of persons indemnified, (ii) any issue or defense as to charitable or governmental immunity, and (iii) any issue or defense based on any statute of limitations if suit is instituted within three years from the date on which the claimant first knew, or reasonably could have

known, of his injury or damage and the cause thereof. The waiver of any such issue or defense shall be effective regardless of whether such issue or defense may otherwise be deemed jurisdictional or relating to an element in the cause of action. When so incorporated, such waivers shall be judicially enforcible in accordance with their terms by the claimant against the person indemnified. Such waivers shall not preclude a defense based upon a failure to take reasonable steps to mitigate damages, nor shall such waivers apply to injury or damage to a claimant or to a claimant's property which is intentionally sustained by the claimant or which results from a nuclear incident intentionally and wrongfully caused by the claimant. The waivers authorized in this subsection shall, as to indemnitors, be effective only with respect to those obligations set forth in the insurance policies or the contracts furnished as proof of financial protection and in the indemnity agreements. Such waivers shall not apply to, or prejudice the prosecution or defense of any claim or portion of claim which is not within the protection afforded under (i) the terms of insurance policies or contracts furnished as

proof of financial protection, or indemnity agreements, and (ii) the limit of liability provisions of subsection (e) of this section.

(2) With respect to any public liability action arising out of or resulting from a nuclear incident, the United States district court in the district where the nuclear incident takes place, or in the case of a nuclear incident taking place outside the United States, the United States District Court for the District of Columbia, shall have original jurisdiction without regard to the citizenship of any party or the amount in controversy. Upon motion of the defendant or of the Commission, or the Secretary, as appropriate, any such action pending in any State court (including any such action pending August 20, 1988) or United States district court shall be removed or transferred to the United States district court having venue under this subsection. In any action that is or becomes removable pursuant to this paragraph, a petition for removal shall be filed within the period provided in section 1446 of Title 28, or within the 30-day period beginning on August 20, 1988, whichever occurs later.

(s) Limitation on punitive damages.

No court may award punitive damages in any action with respect to a nuclear incident or precautionary evacuation against a person on behalf of whom the United States is obligated to make payments under an agreement of indemnification covering such incident or evacuation.

ARGUMENT.

1. THE NEW MATTER, DATED AUGUST 27, 1993 IS PRESENTED AS A CONFLICT OF INTEREST ISSUE; WHICH REMAINED CONCEALED FOR DEFENDANTS ADVANTAGE.

This supplemental brief is based upon intervening matter (dated August 27, 1993) and not available at the time of petitioners last filing. (appendix, pg. 24) Defendants (NRC) have made statements toward an "extra-ordinary nuclear occurrence" based upon an in-adequate investigation, and responded to by an agencies CLOSEOUT STATEMENT, from Petitioner (appendix, pg. 1) issued on (Sept. 3, 1993).

Petitioner identifies a "conflict of interest" area in the contract clauses, 952.250 clauses related to indemnification of contractors, 952.250-70, nuclear hazards indemnity. (appendix, pg. 5). 952.250 (D); DOE and the contractor on behalf of itself and others indemnified, Insofar as their interests appear, each agrees to waive: (i) (ii) (iii); (e) (1), (2), (3), (4), (5), (6), (7), and petitioner

makes reference to (J), apparently the contracts disputes clause.

Another conflict of interest area which is directly related to the contracts clause 952.250-70. (Certainly knowing and wilful violations on the part of a contractor which results in serious injury or death or major property damage would constitute a felony under the laws of every state). pg. 239, Hearings on S. 44 and S. 843 before the Subcommittee on Nuclear Regulation of the Committee on Environment and Public Works, United States Senate, 100th Cong. 1st Sess. 100-214 (1987).

In the contracts and 42 USC 2210, the other persons indemnified may include the United States by DOE or NRC. The dumping on private property by agencies of the United States was done by definition as a <u>contractor</u>. The felony dumping at night, in violation of Acts of Congress and other Statutes suggests DOE and NRC in conjunction with other agencies acted as a contractor on behalf of the United States, the United States being other persons indemnified.

Here again the August 27, 1993 report by the NRC and the Summary Closeout correspond to the foregoing.

The phrase "other persons (s) who may be liable for public liability" arguably includes the United States. (pg. 267, Legislative Inquiry on the Price-Anderson Act, Subcommittee on Energy Research and Production, of the Committee on Science and Technology, U.S. House of Representatives, 99th Cong. 2nd session (1986).

The contract clauses and 42 USC 2210 does not directly bar petitioner's third-party indemnity action against the United States based on the foregoing and the petition, but appears to have a grave conflict of interest, which apparently concerned defendants enough to issue the August 27, 1993 paper.

A. DEFENDANTS HAVE ALLEGEDLY A COMPARATIVE FAULT ISSUE BY INVOLVEMENT AND CONFLICT OF INTEREST.

Defendants have allegedly dumped the nuclear waste, have left no indication of any

comparative fault with the State Court in any hearings or other records which appears to be consistent with the "conflict of Interest" in the foregoing and may have at their option removed the action. Petitioner makes reference to the comparative fault issue and the conflict of interest issue, and (ENO). In case UNC Resources, Inc. V. Benally, 518 F. Supp. 1046, (D.C. Airz. 1981). This section conferring original jurisdiction on United States District Courts, without regard for diversity of citizenship or amount of controversy, over any public action arising out of extraordinary nuclear occurrence did not apply where Secretary of Energy had not designated incident involved as extraordinary nuclear occurrence.

Another perceived conflict of interest from the contract clauses and 2210 may be Classified Material, like the 1400 barrels dumped in Lake Superior by the U.S. Army. (appendix, pg. 19) In Mckay V. United States, 703 F. 2d 464, (C.A. Colo. 1983), neither political question nor separation of powers doc-

trine precluded judicial relief against government for damages to property caused by radiation emissions from nuclear weapons manufacturing plant.

Petitioner, in his Closeout Summary (appendix, pg. 1) opened up the nuclear waste burial site (on private property) with a geiger counter whereby substantial radiation was indicated, (by product nuclear waste) was indicated by the characteristics it presented. This was further substantiated with clorinated hydrocarbons, (cloroform) and an indicater (dye) for acid production. Although maximum sensitivity is high (about 25 rads) clorinated hydrocarbons are very poor equivalents for tissue. (pg. 20, Your Body and Radiation, U.S. Atomic Energy Commission/Division of Technical Information. (1969). Petitioner makes very clear that the August 27, 1993 report by NRC has nothing to do with the use of the geiger counter and the opening of the nuclear waste area by petitioner. See Closeout Summary, (appendix, pg. 1).

B. COMPARABLE EXAMPLES OF ACTIONS TAKEN BY THE NUCLEAR REGULATORY COMMISSION ARE CONTRADICTORY IN REGARD TO PETITIONER'S ACTION.

The mutated animals are indicative of excessive radiation or ingestion of the nuclear material itself. See Closeout Summary, (appendix, pg. 1). The NRC report from the Kerr-McGee explosion near Gore, Oklahoma left large numbers of animals examined by experts and some of the animals were apparently deceased. The point here is that many animals apparently contaminated or suspected of contamination were attended to. The August 27, 1993 report by the NRC left a mockery of mutated animals, indicating a strong conflict of interest. This is further indicated by the health physics support offered to the Corp. of Engineers, a Mr. Robert Demsey, who is the same person regarding Nike Base 20 and the Corp. of Engineers. The lack of interest from the NRC in digging for concealed nuclear waste again presents a conflict of interest for any (ENO) determination. See Closeout Sum-

mary, (appendix, pg. 1)

C. THE CONFLICT OF INTERESTS MAKE THE INVESTIGATION SELF-DEFEATING.

952.250-70 contract clauses (appendix, pg. 9), in its entirety and specifically (D)(3), DOE and the contractor on behalf of itself and other persons indemnified, insofar as their interests appear, each agrees to waive:

The foregoing is in the event of an extraordinary nuclear occurrence; (D)(d). The government dumped licensed nuclear material on private property, a state felony, violating Acts of Congress, Federal laws, State laws, County laws and township laws. To go further on any investigation is self defeating. The conflict of interest existed apparently for several years of dumping at night. (42 USC 2210a (a)(b). Under 2210a (b) not to enter a contract if a conflict exists.

952.250-70 contract clauses (ENO) status leaves the agency waiving all defenses, as to jurisdictional or to an element in the cause of action. The foregoing appears to also leave

2210 M, procedures for emergency assistance in an adverse position.

The Nuclear Waste Fund is not funded per se out of the Treasury Dept. and other funds are not out of the Treasury Dept, but are out of funds paid for by power plant operators. (pg. 13, Hearing on H.R. 1414 before the Subcomittee on Energy Research and Development of the Committee on Science, Space and Technology, House of Representatives, 100th Cong. 1st Sess. no. 30 (1987). The conflict of Interest again appears to be extensive in regards to the August 27, 1993 NRC response.

On rare occassions, there might be overlapping coverage, but then at most, there would have to be an allocation of the liability coverage between, for example the Nuclear Regulatory Commission and the Energy Department. pg. 149, Hearings on H.R. 1414, before the Subcommittee on Energy Research and Development of the Committee on Science, Space and Technology, House of Representatives, 100th Cong. 1st Sess. no. 30 (1987).

CONCLUSION

The NRC at or near Gore, Oklahoma made and used the following report and also had a list of the following agencies/other in the report.

ASSESSMENT OF THE PUBLIC HEALTH IMPACT FROM THE ACCIDENTAL RELEASE OF UF6 AT THE SEQUOYAH FUELS CORPORATION FACILITY AT GORE, OKLAHOMA

DOCKET NO. 40-8027

LICENSE NO. SUB-1010

The NRC immediately offered health physics support in regards to the U.S. Army-dumping in Lake Superior and stated since Honeywell was and is an NRC licensee, we are interested in the results of the search and recovery operations. (appendix, pg. 19).

Petitioner presents the foregoing and immediate information as a vital part of the case and the foregoing is indicative of the "conflict of interest" problem presented and further alleges that this has been a major part of the problem with the case itself.

Respectfully submitted,

Re: Closeout Summary of Nuclear Regulatory Commission, Dept. of Energy and Indemnified Contractors including any other relevant agencies of the U.S. Government, on allegations of Nuclear Waste dumping, Nike Base 20, surrounding property.

1. In response to the August 27, 1993 letter on a May 26, 1992 investigation of nuclear waste & other, the inspection was done in approximately 3 piece suits; whereby illegal dumping of nuclear waste is expected to be concealed, as in the ground, (underground). For example, the Kenyon, Minn. burial dump belonging to 3-M Co. was approximately an

auger type investigation to apparently approximately 5 feet. The investigation was inadequate, dated June 16, 1992, near the Nike Site, Roberts, Wisc.. Alleger Daniel P. Maloney, opened up a burial site with a geiger counter, the 1st part of 1993; excessive radiation was indicated. This was substantiated with clorinated hydrocarbons (cloroform) and an indicater (dye) for acid output; the foregoing left substantial and high radiation output. The material also glowed in the dark.

2. The investigation regarding mutated animals presents a mockery of helpless creatures, with substantial mutations, each generation and birth increasing the mutagenic characteristics in the species indicative of "radiation caused mutations". The NRC, at Gore, Oklahoma (Kerr McGee accident) used the Oklahoma University system to examine contaminated animals both dead and alive. After examination by the University System reports were developed by the NRC to evaluate the large number of animals which were contaminated by the (Kerr McGee

explosion), Gore Oklahoma. The mockery of the report of August 27, 1993 on the 1992 investigation of mutated animals around Nike Base 20, Roberts, Wis. is not only inadequate but suggests that the mutations are directly caused by the pit hole alleger Maloney located with a geiger counter and opened up with the geiger counter as a monitor the first part of 1993. It should be very clear that the area alleger Maloney opened up has nothing to do with the report issued on August 27, 1993 by the NRC.

3. The threats toward "allegers life" are on file in the St. Croix Co. Courthouse. Any other are possibily indicative of listening anxiety problems or other related, "nuclear hazard" or the existence of nuclear hazard anxiety.

4. Mr. Wiedeman indicated he would also consult with the Dept. of Energy to see what they may be doing at or near the alleged nuclear contaminated area.

5. Alleger Maloney draws attention to the clauses related to indemnification of contrac-

tors, 952. 250, and 952.250-70 Nuclear hazards indemnity. The contract clause in indemnification contracts (D) (3) 952.250; DOE and the contractor on behalf of itself and other persons indemnified, insofar as their interests appear, each agrees to waive: (i) Any issue or defense as to the conduct of the claimant or fault of persons indemnified, including but not limited to:

(A) Negligence;

(B) Contributory negligence;

(C) Assumption of risk; or

(D) Unforeseeable intervening causes, whether involving the conduct of a third person or an act of God.

(ATTACHED) 952.250; two pages.

952.250 CLAUSES RELATED TO INDEMNIFICATION OF CONTRACTORS.

952.250-70 NUCLEAR HAZARDS INDEMNITY.

In accordance with the provisions prescribed in Subpart 950.70 include the following clause in applicable contracts.

Nuclear Hazards Indemnity (Apr 1984)

(a) This clause is incorporated into this contract pursuant to the authority contained in subsection 170(d) of the Atomic Energy Act of 1954, as amended (hereinafter called the Act.)

(1) The definitions set out in the Act shall apply to this article.

(2) The term "contract location" means any DOE facility, installation, or site at which contractual activity under this contract is being carried on, and any contractor-owned or controlled facility, installation or site at which the contractor is engaged in the performance of contractual activity under this contract.

(3) The term "extraordinary nuclear occurrence" means an event which DOE has determined

to be an extraordinary nuclear occurrence as defined in the Act. A determination of whether or not there has been an extraordinary nuclear occurrence will be made in accordance with the procedures in Subpart E of 10 CFR 140.

(b) Except as hereafter permitted or required in writing by DOE, the contractor will not be required or provide or maintain, and will not provide or maintain at Government expense, any form of financial protection to cover public liability. DOE may at any time require in writing that the contractor provide and maintain financial protection of such a type and in such amount as DOE shall determine to be appropriate to cover public liability, arising out of or in connection with the contractual activity, provided that the costs of financial protection will be reimbursed to the contractor by DOE.

(c)(1) To the extent that the contractor and other persons indemnified are not compensated by any financial protection, permitted or required by DOE or the Nuclear Regulatory Com-

mission (NRC), DOE will indemnify the contractor and other persons indemnified against (i) claims for public liability as described in subparagraph (2) of this paragraph (c); and (ii) the reasonable cost of investigating and settling claims and defending suits for damage for such public liability, provided that DOE's liability, excluding such reasonable costs, under all indemnity agreements entered into by DOE under section 170 of the Act, including this contract, shall not exceed $500 million in the aggregate for each nuclear incident occurring within the United States or $100 million in the aggregate for each nuclear incident occurring outside the United States, irrespective of the number of persons indemnified in connection with this contract.

(2) The public liability referred to in paragraph (c)(1) of this section is public liability which (i) arises out of or in connection with the contractual activity; and (ii) arises out of results from:

(A) A nuclear incident which takes place at a contract location; or

(B) A nuclear incident which takes place at any other location and arises out of or in the course of the performance of contractual activity under this contract by the contractor's employees, individual consultants, borrowed personnel or other persons for the consequence of whose acts or omissions the contractor is liable, provided that such incident is not covered by any other indemnity agreement entered into by DOE or the NRC pursuant to section 170 of the Act: or

(C) A nuclear incident which arises out of or in the course of transportation of source, special nuclear, or by-product materials to or from a contract location, provided such incident is not covered by any indemnity agreement entered into by DOE with the transporting carrier, or with a carrier's organization acting for the benefit of the transporting carrier, or with a licensee of NRC, pursuant to section 170 of the Act; or

(D) A nuclear incident which involves items (such as equipment, material, facilities, or

design or other data) produced or delivered under this contract, provided such incident is not covered by any other indemnity agreement entered into by DOE or NRC pursuant to section 170 of the Act.

(d) In the event of an extraordinary nuclear occurrence which:

(1) Arises out of or results from or occurs in the course of the construction, possession, or operation of a production or utilization facility, or

(2) Arises out of or results from or occurs in the course of transportation of source material, by-product material, or special nuclear material to or from a production or utilization facility, or

(3) During the course of the contract activity, arises out of or results from the possession, operation, or use by the contractor or a subcontractor of a device utilizing special nuclear material or byproduct material.

DOE and the contractor on behalf of itself and other persons indemnified, insofar as

their interests appear, each agrees to waive:

(i) Any issue or defense as to the conduct of the claimant or fault of persons indemnified, including, but not limited to:

(A) Negligence;

(B) Contributory negligence:

(C) Assumption of risk; or

(D) Unforeseeable intervening causes, whether involving the conduct of a third person or an act of God.

As used herein, "conduct of the claimant" includes conduct of persons through whom the claimant derives its cause of action;

(ii) Any issue or defense as to charitable or governmental immunity;

(iii) Any issue or defense based on any statute of limitations, if suit is instituted within 3 years from the date on which the claimant first knew, or reasonably could have known, of his injury or change and the cause thereof, but in no event more than 20 years after the date of the nuclear incident. The waiver of any such issue or defense shall be effective regardless of whether such issue

or defense may otherwise be deemed jurisdictional or relating to an element in the cause of action. The waiver shall be judicially enforceable in accordance with its terms by the claimant against the person indemnified.

(e) The waivers set forth in paragraph (d) of this clause:

(1) Shall not preclude a defense based upon a failure to take reasonable steps to mitigate damages;

(2) Shall not apply to injury or damage to a claimant's property which is intentionally sustained by the claimant or which results from a nuclear incident intentionally and wrongfully caused by the claimant;

(3) Shall not apply to injury to a claimant who is employed at the site of and in connection with the activity where the extraordinary nuclear occurrence takes place, if benfits therefore are either payable or required to be provided under any workmen's compensation or occupational disease law;

(4) Shall not apply to any claim for punitive or exemplary damages, provided, with

respect to any claim for wrongful death under any State law which provides for damages only punitive in nature, this exclusion does not apply to the extent that the claimant has sustained actual damages, measured by the pecuniary injuries resulting from such death but not to exceed the maximum amount otherwise recoverable under such law;

(5) Shall not apply to any claim resulting from a nuclear incident occurring outside the United States;

(6) Shall be effective only with respect to those obligations set forth in this agreement and in insurance policies, contracts or other proof of financial protection; and

(7) Shall not apply to, or prejudice the prosecution or defense of, any claim or portion of claim which is not within the protection afforded under (i) the limit of liability provisions under subsection 170e of the Atomic Energy Act of 1954, as amended, and (ii) the terms of this agreement and the terms of insurance policies, contracts or other

proof of financial protection.

(f) The contractor shall give immediate written notice to DOE of any known action or claim filed or made against the contractor or other person indemnified for public liability as defined in paragraph (c)(2). Except as otherwise directed by DOE, the contractor shall furnish promptly to DOE, copies of all pertinent papers received by the contractor or filed with respect to such actions or claims. When DOE shall determine that the Government will probably be required to make indemnity payments under the provisions of (c) above, DOE shall have the right to, and shall collaborate with, the contractor and any other person indemnified in the settlement or defense of any action or claim and shall have the right (1) to require the prior approval of DOE for the payment of any claim that DOE may be required to indemnify hereunder, and (2) to appear through the Attorney General on behalf of the contractor or other person indemnified in any action brought upon any claim that DOE may be re-

quired to indemnify hereunder, take charge of such action, and settle or defend any such action. If the settlement or defense of any such action or claim is undertaken by DOE, the contractor or other person indemnified shall furnish by DOE, the contractor or other person indemnified shall furnish all-reasonable assistance in effecting a settlement or asserting a defense.

(g) The indemnity provided by this clause shall not apply to public liability arising out of, or in connection with, any activity that is performed at a licensed facility, and that is covered by a Nuclear Regulatory Commission indemnity agreement authorized by section 170 of the Act.

(h) The obligations of DOE under this clause shall not be affected by any failure on the part of the contractor to fulfill its obligation under this contract and shall be unaffected by the death, disability, or termination of existence of the contractor, or by the completion, termination or expiration of this

contract.

(i) The parties to this contract enter into this clause upon the condition that this clause may be amended at any time by the mutual written agreement of DOE and the contractor, and that such amendment may, by its express terms, provide that it will apply to any nuclear incidents which occur thereafter.

(j) The provisions of this clause shall not be limited in any way by, and shall be interpreted without reference to, any other clause of this contract, including the Disputes clause provided, however, that the following provisions of the contract: Clause entitled, Covenant Against Contingent Fees; the clause intitled, Officials Not to Benifit; and the clause entitled, Examination of Records by Comptroller General; and any provisions later added to this contract which under applicable Federal law, including statutes, executive orders and regulations, are required to be included in agreements of the type contained in this article, shall apply to this clause.

ALTERNATE I: The following paragraph will

be included in for those contracts containing the indemnity clause executed under the general contract authority of DOE.

(k) To the extent that the Contractor is compensated by any financial protection, or is indemnified pursuant to this clause or is same, pursuant to section 170e of the Atomic Energy Act of 1954, as amended, the provisions of clause providing General Authority Indemnity, shall not apply.

The mockery of the mutated animals and the Gore, Oklahoma (Kerr McGee explosion) investigation whereby animals were immediately examined intensively by qualified University Officials of the Oklahoma university system indicates that the contract clauses and negligence are leaving a total inadequate investigation. 952.250-70.

The NRC jumped into the barrel dumping in Lake Superior by the U.S. ARMY, offering immediate health physics to whatever was needed. The 1400 barrels dumped in Lake Superior and the health physics response by the NRC is not apparent at the investigation at or near NIKE BASE 20, Roberts, Wisc.. It is more apparent that 952.250-70 contract clauses whereby the agency and the contractor waive any issues or defenses. (D); are conflict of interest.

6. Mr. Hoffman, Mark Hoffman from the Minnesota Pollution Control Agency may have made a "slip of the tongue" about UFO visitors; Marks former Father-in-law Mr. Cooklock head of the Univ. of Wis. River Falls, library system has been chasing UFOs and related activities for many years and has a very extensive

record system on the foregoing at the UW-RF. The local Government officials can furnish any of Mr. Cooklock's records as needed.

7. The use of special radiation equipment is indicated by the characteristics of the animal mutations and substantial radiation from the opened up pit area by alleger Maloney and the elaborate equipment may have to be directed from several Private Laboratories such as the NRC used at Gore, Oklahoma. The conflict of interest of any actions regarding 952.250-70 and other actions; apparently are going to override any adequate investigation.

ATTN: Mr. Robert Dempsey :::::IN NIKE BASE PRESENTLY:

Engineer Manager

1421 U.S.P.O., Custom House

St. Paul, Mn. 55101-1479

Dear Mr. Dempsey:

This refers to your January 2, 1991 telephone conversation with Mr. James Lynch of my staff, regarding the Corp's efforts to recover Honeywell, Inc. waste drums from Lake Superior. Since it is alleged that the drums may contain radioactive material and since Honeywell was and is an NRC licensee, we are interested in the results of the search and recovery operations.

Please keep this office informed of any developments relating to the recovery efforts. We would also appreciate a copy of your report, which we understand should be available in February, and a copy of the Army's 1977 report on this same subject. If health physics support is needed during the process, we will make every effort to assist you. Your cooperation in this matter is greatly appreciated. Followup information or questions regarding this issue should be addressed to Mr. Lynch or Mr. J.

Caniano at (708) 790-5500.

MEDIA ADVISORY

CORPS AWARDS CONTRACT FOR LAKE SUPERIOR BARREL SEARCH

WHO: St. Paul District, U.S. Army Corps of Engineers, St. Paul, Minnesota

WHAT: Has awarded a contract to Hazard Control, Inc. of Minneapolis, Minn. in the amount of $16,550.00 to conduct a search of the Lake Superior bottom near Duluth, Minn. for barrels dumped into Lake Superior by the U.S. Army between 1959 and 1962. The 1,437 barrels contain metal scraps produced during the research and manufacture of classified munitions.

The search operation has three phases. First, the contractor will conduct an electronic search of the 20-square mile target area using sonar and electro-magnetic detection systems. The second phase of the search involves a search of possible barrel locations based on historical records and data from the electronic search. The second phase will use a two-person submarine provided by the contractor to attempt to locate and photograph as many barrels as possible. The contract allows for approximately five days of search operations. If time permits within the contract, a third phase might include closer inspection of located barrels and an at-

tempt to recover one or two barrels. Any barrel recovered will be sealed in an over-sized container and sent to an independent laboratory for analysis of the contents.

WHERE: The search operation will be conducted in an approximately 20-square mile area off the North Shore of Lake Superior between the Lester River and the Knife River. Records indicate that the barrels were dumped in water greater than 100-300 feet in depth.

WHEN: The contract was awarded on September 28, 1990. The search is tentatively scheduled to begin on Thursday October 11, 1990, weather permitting.

WHY: The barrel search project is being condcuted under the Defense Environmental Restoration Program, a Department of Defense subsection of the EPA Superfund Program. One aspect of the restoration program includes finding and inspecting sites formerly owned or used by DOD. Once located, the sites are inspected for hazardous debris, munitions or toxic materials related to the operation of the site by DOD. Since the barrels contained material generated by a DOD contractor working on a classified defense munitions contract and the disposal was directed by an Army organization, the barrel disposal site

qualifies for review and analysis under the Defense Environmental Restoration Program for Formely Used Defense Sites. The current contract will provide data to be used by the Corps in determining the need for any future remedial action.

MEDIA ARRANGEMENTS: Media arrangements (news conferences, equipment demonstration,, Duluth media center telephone number, etc.) will be announced on October 9th.

CONTACT: Ken Gardner or Joan Guilfoyle at 612-220-0201. US Army Corps of Engineers, 1421 US Post Office, St. Paul MN 55101-9808. The project's media center will open at the Corps' Duluth Area Office on Thursday, October 11th.

AMS NO. RIII-93-A-0077

Daniel P. Maloney

Rt. 1, Box 313G

Roberts, Wisc. 54023

Dear Mr. Maloney:

By letter dated June 4, 1993, you provided the U.S. Nuclear Regulatory Commission with information concerning a non-licensed dump site in Hudson, Wisconsin. Our review into your allegation would be closed based upon the following facts:

-Our inspection into your previous concerns on May 26, 1992 included radiation surveys around the Nike Missile Site were unsubstantiated, Report No. 99990003/92-023 (DRSS), attached;

-The NRC does not have regulatory jurisdiction over natural occurring radioactive mat-

erial (NORM), e.g. radium-226; however, the State of Wisconsin is the cognizant authority over these materials;

-Prior the our 1992 inspection the State of Wisconsin, Department of Health was notified to participate in the inspection; however, they declined.

Your cooperation with the U.S. Nuclear Regulatory Commission was appreciated.

Sincerely,

Donald E. Funk Jr.
Office Allegation Coordinator

Enclosure: As stated

SUBJECT: TRIP REPORT RE: RESOLUTION OF ALLEGATION NO. RIII-92-A-0029, ALLEGED NUCLEAR WASTE DUMPING, ROBERTS, WISCONSIN.
Report No. 99990003/92-023(DRSS)

On March 16, 1992, Region III received a letter dated February 12, 1992 (see Attachment A) from a citizen residing in Roberts, Wisconsin. This letter alleged numerous (non-specific) allegations regarding animal mutations, thyroid problems and radiological contamination to the environment in and around the town of Roberts, Wisconsin. The alleger also provided the NRC with 23 photographs of plywood labeled "3M-Hall INTERNATIONAL-SURGICAL" that the alleger assumed were radiologically contaminated (see Attachment B). An allegation review board was conducted on March 27, 1992, and it was decided that a radiologic survey could be conducted when an inspector was in the general area. On April 7, 1992, I contacted the alleger by phone to have him clarify the allegations and to inform him that I wanted to meet with him on May 26, 1992, to perform a radiologic survey and determine if radiation or contamination were present. The alleger clarified the allegations, which were (1) the alleger assumed that the plywood in the photographs

was contaminated with radioactive material because the labeling on the plywood was from 3M, a local company in St. Paul, Minnesota area that has an NRC license to possess and use radioactive material and he knew that a man named Hall worked with radioactive material at 3M. This plywood was used to construct a chicken house and recently hatched chicks had malformations on the toe of the chicks claw. The alleger assumed that the malformations were mutations caused by exposure to radiation. The alleger was also concerned about mutations seen in other non-domestic wild life, e.g. five foot long blue racer snake and a house cat with two paws on one leg (See Attachment C), the alleger also claimed to have observed in the local area, a mountain lion with three paws on a rear leg. The alleger was also concerned about radiologic contamination in and around the property near a former Nike missile base located near his residence, and also claimed that he first became aware of the radiologic contamination from an individual by the name of Mark Hoffman that

was employed at the Minnesota Pollution Control Agency. In this respect the alleger claimed that Mr. Hoffman conducted a radiation survey with a Geiger counter and showed the alleger various areas in and around the allegers property that were radiologically contaminated. The alleger also claimed that his life has been threatened by various federal, state and local government agency representatives because of his knowledge of the above referenced allegations (See Attachment D-page 2). When we questioned him specifically as to which agencies have threatened his life his response was the Central Intelligence Agency (CIA), the Pentagon and the local Deputy Sheriff of Saint Croix County, Wisconsin. On the morning of May 26, 1992, Ray Glinski and I met with Messrs. Robert Wissink and Duane Hall of 3M, St. Paul, Minnesota, and showed them the 23 photographs in Attachment B, and asked them if they could identify the markings on the Plywood. According to Messrs. Wissink and Hall, the blue colored "3M" logo was discontinued approximately 15 years ago and the company currently uses a red logo. The labeling "HALL INTERNATIONAL-SURGICAL" was a subsidiary of 3M

that was liquidated in September 1974. This subsidiary of 3M was involved in the manufacturing and distribution of surgical equipment and neurological devices sold to the medical field. This subsidiary was not involved in any manufacturing or distribution of radioactive devices or equipment. Messrs. Wissink and Hall assumed that the plywood was a shipping crate that was sold as scrap, which was common practice for 3M.

On the afternoon of May 26, 1992, we met with Max Ihrke, Captain, St. Croix County Sheriff Office to discuss his knowledge of radioactive dumping in the Roberts, Wisconsin area. Captain Ihrke indicated that an individual living in the town of Roberts, Wisconsin has made numerous allegations regarding chemical contamination in and around the Nike missile base in Roberts, Wisconsin to various federal, state and local agencies along with requests for a congressional investigation into improprieties of various federal agencies. According to Captain Ihrke, none of the allegations

have been substantiated (See Attachment D). CAptain Ihrke also indicated that there is pending litigation from this individual against the current Deputy Sheriff's Office. On the afternoon of May 26, 1992, we met with the alleger at his home in rural Roberts, Wisconsin. The alleger showed the inspectors the chicken house that he assumed was radiologically contaminated. Radiation surveys conducted with a Ludlum, Model 3, G-M, NRC tag No. 03701, which was calibrated on January 22, 1992, and an Eberline ESP-1, alpha scintillation counter, NRC tag No. 33845, which was also last calibrated in January 1992, did not indicate any levels of radiation above natural background. Both instruments were checked for correct response to radiation with check sources of cesium-137 and thorium-230 prior to the above referenced radiologic surveys. The inspectors also followed the alleger to an area aduacent to the Nike missile base and conducted additional radiologic surveys of various areas around the Nike base that the

alleger was concerned about. Again, these surveys did not indicate any radiation above natural backgroung.

On June 1, 1992, Mr. Mark Hoffman from the Minnesota Pollution Control Agency was contacted by telephone. Mr. Hoffman stated that he lives in the area of Roberts, Wisconsin; however, he denies that he has ever performed any radiologic surveys or any other environmental evaluations in or around Roberts, Wisconsin. Mr. Hoffman claimed that his only contact with the alleger was to request permission to hunt on his property. Mr. Hoffman also indicated that being an employee with the Minnesota Pollution Control Agency, he did not have any regulatory authority in the State of Wisconsin. Mr. Hoffman also indicated that the alleger claimed that he has been visited by unidentified flying objects(UFO'S).

On June 1, 1992, Sheriff Ralph Bader, Saint Croix County Sheriff was contacted by telephone. Sheriff Bader stated that he had no direct knowledge of nuclear waste dumping in or around

the NIKE missile base in Roberts, Wisconsin. Sheriff Bader also stated that in his 60 years as a resident in the Saint Croix County area, he has never seen any large mutant animals or any mountain lions in the area.

CONCLUSION

The allegation that the plywood from a former 3M subsidiary was contaminated with radioactive material was not substantiated. This conclusion was based upon direct radiation measurements by the NRC inspectors.

The allegation that an employee from the Minnesota Pollution Control Agency conducted a radiological survey and detected radiation could not be substantiated. This conclusion was based upon statements be the individual that allegedly conducted the surveys.

The allegation that property around a NIKE missile base in Roberts, Wisconsin was contaminated with radioactive material was not substantiated. This conclusion was based upon direct rediation measurements made by the inspectors.

The allegation that mutational deformities caused by exposure to radiation in both domestic and non-domestic animals in the Roberts, Wisconsin area was not substantiated. This conclusion was based upon statements made by various long term residents in the Roberts, Wisconsin area and the NRC inspectors findings that the specific areas that the alleger claimed were radiologically contaminated did not indicate any radiation levels above natural background.

We therefore recommend that this allegation be closed and with no further foolow up inspection activities. The inspection findings were verbally explained to the alleger during the on-site inspection conducted on May 26, 1992.
